STAT

SUPPLEMENT

AIR RECONNAISSANCE OF SOUTH CHINA AND NORTH KOREA [REDACTED]

STAT

1. [REDACTED] One D-21 (TAGBOARD) drone reconnaissance mission 25X1 over South China during November is proposed to meet high priority intelligence collection requirements. The lack of high resolution coverage in China during recent months is a matter of growing concern. This deficiency in coverage continues to degrade DIA's capability to assess the Chinese military posture in this important area. The route attached is representative of the mission to be flown. CINCSAC will select the actual route to be flown and the date of execution. The actual track will be planned to maximize coverage along the South China border area. Although approval for this mission is being requested for November, weather and/or other operational factors could cause actual launch to occur during the succeeding month.

2. [REDACTED] One SR-71 overflight of North Korea is proposed for 25X1 November. This sortie will be planned to satisfy the USIB requirement for quarterly coverage of priority national objectives, plus CINCPAC's requirement for monthly surveillance of the DMZ area. Execution will be contingent upon results of the latest [REDACTED] satellite mission. [REDACTED] 25X1

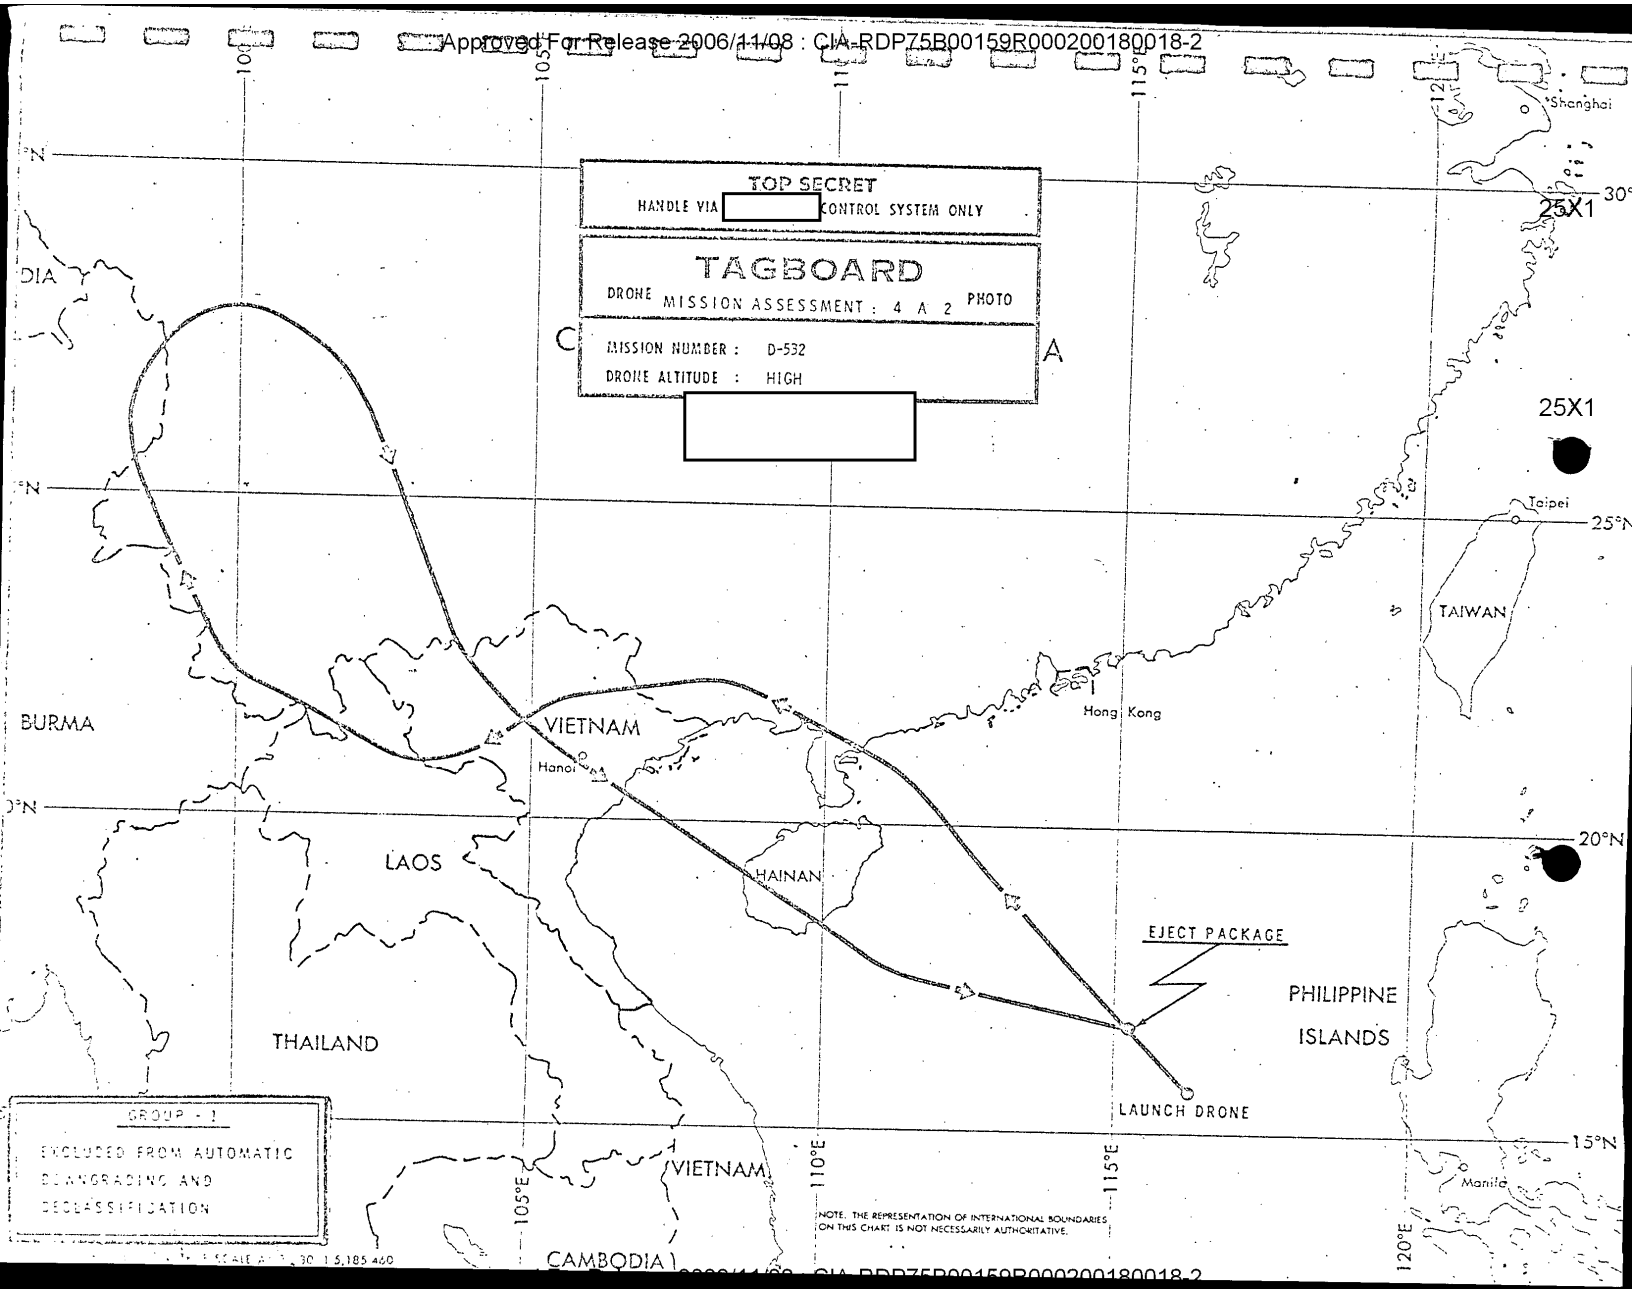

[REDACTED] CINCSAC will determine the actual route, based on weather and other operational factors.

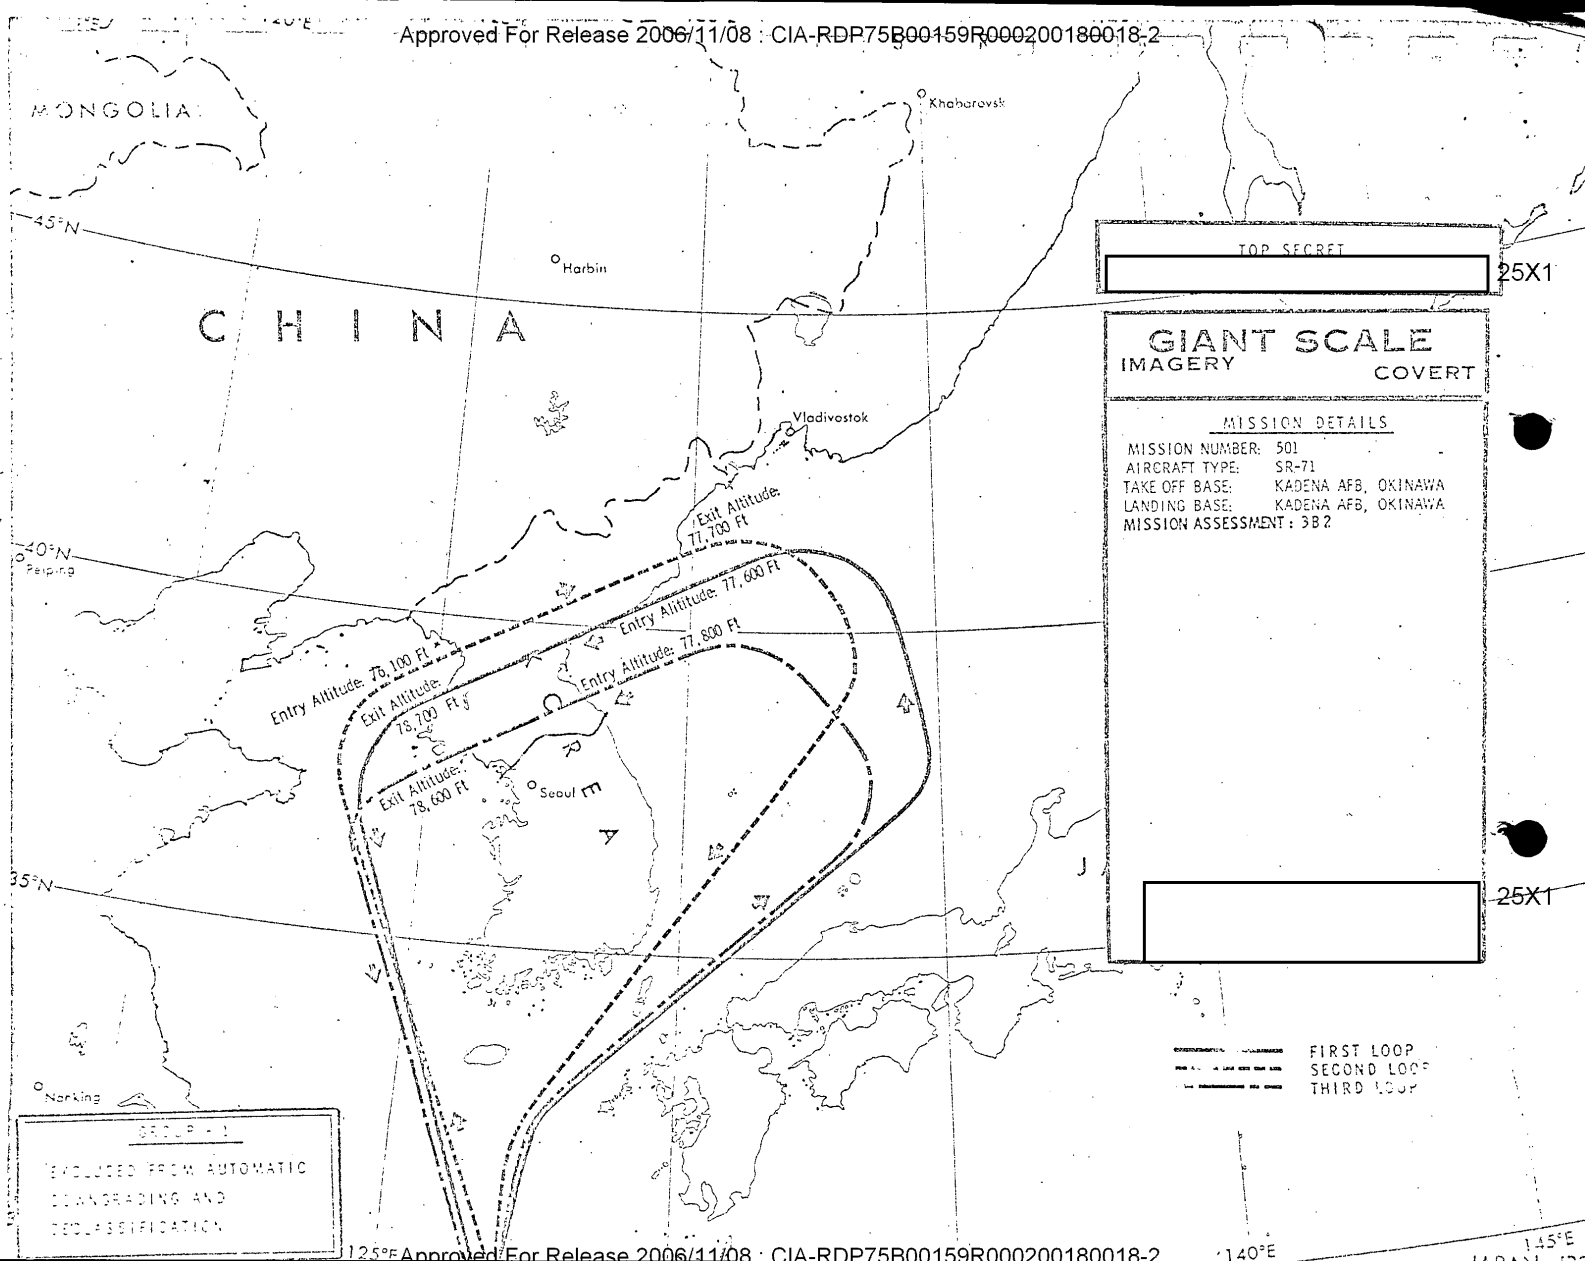

3. [REDACTED] Intent reports will be provided by CINCSAC to the 25X1 Joint Chiefs of Staff prior to launch of the drone over South China and the SR-71 over North Korea.
